<https://docs.gurbanisoul.com/engineering/>

The operating manual for this repository. Start with the invariants: they are non-negotiable, and the prime directive overrides everything else.

Engineering invariants

Before any change — prime directive, data model, conventions & gotchas, how to verify

Local setup, repository map & API

Setting up, running or rebuilding locally; repository map; API reference; iOS DB pair

Delivery, versioning & release

Shipping — versioning, the integration → staging → production loop, delivery tooling, how the iOS app takes each release

Brand & domains

Touching names, domains, URLs or visual identity

Release timeline & known issues

Background on past releases and items still open
