Who to ask, where to look

🕒 2 min read · Updated 27 September 2026

Where questions, bugs, feature ideas, scripture-fidelity concerns, security reports and design decisions each go, and who reviews what.

<https://docs.gurbanisoul.com/onboarding/who-to-ask/>

I want to...	Go to
understand why something is the way it is	the <u>ADRs</u> — every decision that shaped the project, with its context and consequences
find the rule for a change I am making	<u>Engineering invariants</u> first; then the <u>glossary</u> for a term
report a bug in the site, the API or a tool	a <u>bug report</u> ¹
propose a feature	a <u>feature request</u> ²
say that a verse, heading, numeral or Ang looks wrong	a <u>scripture fidelity concern</u> ³ — never a code change ; it is routed to a Granthi or scholar
report a security problem	email support@gurbanisoul.com (<u>SECURITY</u> ⁴); never a public issue
ask how to do something in this repository	open a discussion on the pull request or issue you are working on; the owner reads every one
change how we work (branching, gates, tooling)	propose an ADR in a pull request (<code>docs/adr/NNNN-title.md</code> , status <i>proposed</i>)

Who reviews what

Every change is reviewed by the code owner (`.github/CODEOWNERS`). Some paths are listed there explicitly because a mistake in them reaches the scripture or the apps: the dataset pin (`dataset.lock.json`), the golden contract (`contract/`), the Roman fold (`webapp/romannorm.py`), the verifier (`webapp/verify.py`) and the CI configuration (`.github/`). Expect a slower, closer review on those.

Scripture questions are not answered by engineers. The project keeps a scholar review for anything that changes how the text is extracted, displayed or explained; the answer protocol in `sggs-data` says how a quotation may be shown and how explanation must be labelled.

Company and product names

The company is **Algorythmos Pty Ltd**; the app is **Gurbani Soul**; the website and this wiki are the **Sri Guru Granth Sahib Ji — Knowledge Base**. The scripture is always cited as *Sri Guru Granth Sahib Ji · Ang N*; “Gurbani Soul” names the app, never the text.

Brand & domains has the rest.
