Releases

Updated 25 September 2026

Every release of the platform as a timeline read from CHANGELOG.md — version, date, title and what kind of changes it carried — with a link to the GitHub release and a filter.

<https://docs.gurbanisoul.com/reference/releases/>

CHANGELOG.md is the authoritative history (**Keep a Changelog**¹ from v1.1.0; the earlier entries keep the project’s original prose headings). This page renders it as a timeline; on the site you can filter by version, date or a word from the title. The release process itself — one number across web, API and app, the tag cut only after a verified deploy — is on **Release** and **the delivery pipeline**.
